BIC: ABNANL2A

- Making a **Bitcoin** transaction to this address:

bc1q70jmtqyu2wz3en24t9r7ksd4eww7qvay6xwrx5

Financial responsibility

The Dyne.org foundation, represented by dr. Denis Roio assumes financial responsibility for Devuan.

Dyne.org was established in 2000 and registered at the Chamber of Commerce in Amsterdam in 2005 as a "Stichting" under Dutch law, which equals a non-profit foundation.

Dyne.org's statute includes the mission to research, develop and deploy free and open-source software for scientific goals and cultural and educational purposes. Dyne.org historically supports free-speech campaigns, independent media efforts in crisis zones and the development of ancient but working computer musea. Dyne.org has direct ties to the Free Software Foundation and the GNU project.

Budget guidelines

Being a non-profit, Dyne.org does not retain funds but aims to redistribute them efficiently. Our investment focus for Devuan seeks to keep the yearly turnover as low as 10% on incoming funds, with a fixed low reserve of 4000€ to face unpredictable expenses.

To abide by tax legislation in the Netherlands, any refund perceived by volunteers cannot exceed 1500€ per year. If there will ever be any reason to pay anyone above such an amount, we will arrange a contract and an explanation will be annexed to this report.

We report the Devuan budget in € (EUR).

All the amounts reported are netto: we subtract processor fees.

Thanks, everyone, for your continued support!
